Amazon is offering teams more flexibility on where to work. Read more from Amazon CEO, Andy Jassy.   ✕

Software Development Manager, CloudFront Quickstep Team

Job ID: 2230389 | Amazon Dev Centre Ireland Ltd

DESCRIPTION

Job summary
CloudFront is one of AWS' largest services, at the center of almost every major Internet event. For sporting events such as the Super Bowl, game launches, movies, or TV, there's a tremendous of work that goes on behind the scenes to ensure the data is transferred with high performance and efficiency. If you enjoy solving challenging problems with unparalleled scale, this is the team for you!

The CloudFront Quickstep team is a new initiative to build the next generation web and caching server for CloudFront. Quickstep is being built from the ground up to provide a caching server with the highest possible performance, low latency, and rock solid reliability, all while operating at the scale of billions of requests per minute.

We're looking for experienced software engineers who are familiar with one or more of the following spaces: TCP/UDP communication, packet processing, or optimizing network communication in general.

We:

Are a fast-growing, agile and collaborative group of technologists from diverse backgrounds.
Are inventors and owners, building new technologies and improving existing ones.
Obsess over our customers' needs and experience.
Enjoy the prototyping and tinkering stages, as well as the rigor of making solutions production-ready.

You:

Are comfortable in an agile environment and understand the importance of working/developing iteratively.
Enjoy being part of a strong team of technologists and collaborating with them to build BIG things.
Take ownership and do what it takes to get the job done.
Want to create services at a massive scale used by millions of people.
Are naturally curious about how operate at scale and think of ways to constantly improve those .
Learn from others and help grow those in your team to achieve their best.

BASIC QUALIFICATIONS

- A Bachelor's Degree in Computer Science, Engineering or a related field
- 5+ years of experience writing code
- 3+ years of experience in engineering management
- 3+ years of experience of working on a very large scale secure system

PREFERRED QUALIFICATIONS

- Ability to directly lead and manage junior and senior Software Engineers
- Ability to recruit, hire, mentor, and coach Software Engineers at different levels of experience
- Experience owning all operational metrics and operational excellence for teams' software
- Practical experience with software engineering best practices
- Has a track record of team building, agile processes, and service development
- Has taken software products and services from inception to being used by millions of users
- Has a track record of successfully participating in roadmap prioritization with product management; able to successfully communicate complex topics to customers and business executives alike

Amazon is an equal opportunities employer. We believe passionately that employing a diverse workforce is central to our success. We make recruiting decisions based on your experience and skills. We value your passion to discover, invent, simplify and build. Protecting your privacy and the security of your data is a longstanding top priority for Amazon. Please consult our Privacy Notice

(https://www.amazon.jobs/en/privacy_page) to know more about how we collect, use and transfer the personal data of our candidates.

Our inclusive culture empowers Amazonians to deliver the best results for our customers. If you have a disability and need an adjustment during the application and hiring process, including support for the interview or onboarding process, please contact the Applicant-Candidate Accommodation Team (ACAT), Monday through Friday from 7:00 am GMT - 4:00 pm GMT. If calling directly from the United Kingdom, please dial +44 800 086 9884 (tel:+448000869884). If calling from Ireland, please dial +353 1800 851 489 (tel:+3531800851489).
